

How we are keeping our studio clean, hygienic & safe:

~We have installed MERV 14 air filters into our HVAC system. These filters are the highest grade filters recommended by the CDC.

~We will be steam mopping the floors in between classes.

~All surfaces will be wiped down and sanitized in between classes.

~We will be using a an air fogger, w/ and EPA approved sanitation solution, in between classes to provide comprehensive disinfection for all porous surfaces and hard to reach places.
